Job Title: Distributed Systems Software Engineer (Golang / Kafka)

Job Description:

- Design, build, and maintain high-throughput, low-latency distributed microservices in Golang.
- Own streaming data pipelines leveraging Apache Kafka and Redis event-driven architectures.
- Collaborate with international teams in an English-speaking engineering environment.

Requirements:

- 2+ years of professional experience building scalable backend services in Go.
- Strong hands-on proficiency with microservice patterns, gRPC, and message queues (Kafka/RabbitMQ).
- Solid grasp of concurrency patterns and system performance profiling.
- Good English communication skills (written and spoken).
